                                          You have been given the task of making the content on a social media platform more user-friendly. Your task is to find and return an integer value
                                          representing the count of the number of spaces in a given string S.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 5002835
                                          Input:
                                          A string S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  18 3821°
                                          Output:
                                          Return an integer value representing the count of the number of spaces in a given string S.
  50102835
                                          Example:
                                         Input:
                                         Hello World Hey
                                          Output:
                                          2
 88235000
                                                                                                                                                                                                                                                                                                                                                                                                                                               2028
                                                                                                                                                                                                                                3B2V
